

Short Trak

> **DESTINATION** - Saws for precise sawing of wood.

COMMENTS Stellited and swaged saws are on offer. Short Trak is executed at a Customer's individual order. The order should contain detailed specification of a saw, technical drawing, type of raw material (selected from gang saws and wide sawmill band saws available on offer).

Short Trak [STELLITE TIPPED]

SAWS FOR NARROW KERF CUTTING, FOR COMMINATION

> **DESTINATION** - Saws for narrow kerf cutting ensure various possibilities of use, recommended for cutting thin borders and planks. Short Trak features high efficiency by sawing soft wood as well as wood of European deciduous trees. Saws for commination are recommended for tightening of saws' frame, placed in saws' coupler, between narrow kerf cutting saws; recommended also for cutting wood into equal sawn timber. Allow for processing of outer lamella of each block. That ensures proper thickness of each lamella and possibility of further processing outer lamella without the need of additional adjustment.

COMMENTS Stellite tipping of Short Trak is executed at Customer's individual order. The order should contain detailed specification of saw.

saw's name	b [mm] [widths available]	s [mm] [thickness available]
SHORT TRAK	40 - 260	0,8 - 2,45

ADVANTAGES OF SHORT TRAK SAWS

- high precision of cutting,
- minimum waste of wood because of very thin kerf (up to 20%),
- maximum of economy,
- possibility of immediate further processing without additional stages of proceeding,
- clear surface after cutting prepared for gluing.

GANG SAWS IN MINI VERSION

Saws are cut using laser technology, that opens up a broad range of various profiles of execution, according to what a Customer pleases. Demanding Customers need tools tailor-made to their specific needs. Depending on what is needed, Ro-Ma offers a variety of base materials, sizes and modes of execution to provide its Customers with products well-suited to specific use. Having tools perfectly suited to tasks is crucial for our Customers' competitive strength.
